

# QA Automation Engineer

## ABOUT THE COMPANY

Siteclick is a full-service Digital Agency that offers a wide range of services from Software Development, Project Management, Design & Printing, Branding & Marketing, and IT & Business Consulting.

## JOB DESCRIPTION

We're looking for ambitious people with experience in the field of Quality Assurance, who are eager to learn and refine their skills. If you are the kind of engineer who thrives on solving complex problems, writing efficient code, and utilizing new techniques and technology, this position represents a great opportunity to express your analytical skills and creativity. As a member of our team, you will be part of an open-minded, Agile work environment, with a results-driven mindset, and colleagues who are passionate about their work.

## RESPONSIBILITIES

- Identifying software application weaknesses and target areas;
- Planning and prioritizing testing activities;
- Conducting exploratory testing – simultaneous test design and execution;
- Sketching out ideas for automated software test procedures;
- Review software bug reports and highlight problem areas;
- Writing automation scripts and implementing software applications;
- Helping identify weaknesses and problem areas in the software application;
- Participation in test planning meetings and providing feedback to the testing team;
- Creating detailed reports and listing improvements;
- Ability to communicate technical problems concisely and professionally;
- Reviewing technical specifications and design documents;
- Conducting regression testing when needed;
- Monitoring assurance metrics and process results;
- Identifying quality issues and creating test report;

## DESIRED SKILLS AND EXPERIENCE

- Minimum 3 years of industry experience in the area of Software Testing (Manual and Automation) with a solid understanding of Test Planning, Test Design, Test Execution, and Defect Reporting & Tracking;
- Bachelor's degree in Computer Science or related fields;
- Good written and spoken English: upper-intermediate and higher;

- Strong Experience in Java Programming, Selenium WebDriver, JUnit, and TestNG;
- Knowledge and understanding of the development process and software life-cycle;
- Experience with features, test documentation, bugs, regression, and performance testing;
- Ability to describe bugs clearly and accurately;
- Experience with bug tracking tools like Jira;;
- Proficiency in manual web/mobile/API/requirements testing;
- Knowledge of testing methodologies;
- Defect classification and issue priority/severity rating skills;
- Interest in documentation writing activities;
- Methodical, organized, strong attention to detail;
- Team player;
- Good listener & communicator;
- Working in a proactive way;

## **TOOLS**

- Test management tools: Qase, Tarantula, Dev Console, Fiddler, etc;
- Project management tools: Jira/Asana/Trello/AzureDevOps, Confluence, Jenkins, Git, etc;
- Communication tools: Slack, Google Meet, Microsoft Teams, Skype, Zoom, etc;

## **BENEFITS**

- Fully remote from Romania;
- Collaboration agreement: CIM, PFA, or SRL;
- Flexibility - Choose when and where you work while doing the things you love.;
- Supportive community - by joining Siteclick, you instantly become part of an ever-growing community of specialists who look after each other and grow together;
- Growth - you develop in the desired direction, we provide trainings, coaching and access to a network of experts;
- Well-being - we care about your needs and state of mind;
- Trust - we value your work and opinions;

If you feel like this mix of responsibilities and challenges fits your career plans, this is the job for you.
